

ENVIRONMENTAL POLICY

Ro-Bal Steel Fabrications manufacture, fabricate and erect structural steel products for use in both Private and Public sector construction.

The scope of our environmental management system includes the activities at our office and workshop facility at Washington and steel erection activities at customer's sites.

Considered a leader in the Steel Fabrication sector Ro-Bal Steel Fabrication is committed to the following:-

- Compliance to the requirements of the ISO 14001:2015 standard and to the continual improvement of our environmental management system.
- Compliance with the requirements of applicable legal and other requirements
- Protecting the environment including the prevention of pollution and other specific commitments.
- Establish and review environmental objective/s
- Communicating the requirements of our quality management system to the team at Ro-Bal and involving them in improvements to our key processes, associated controls and procedures.
- Reviewing this policy via the management review process ensuring that it remains fit for purpose.

This policy has been communicated to all employees and is available on our website and to relevant interested parties upon request.
